ELECTIONS

Claims 13-19 are generic to the following disclosed patentably distinct species: distinct polymeric agents. Claim 5 is generic to the following patentably distinct species: a catheter, a guide wire, a balloon, a filter, a stent, a stent graft, a vascular graft, a vascular patch and a shunt. Claims 20 and 21 are generic to the following disclosed patentably distinct species: a diblock and a triblock copolymer. Claim 26 is generic to the following patentably distinct species: a supplemental polymer. In each case, the species are independent or distinct because a prior art reference anticipating claim 1 with respect to one species would not render the claim obvious under 35 U.S.C. 103 with respect to another species. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species in each case, even though this requirement is traversed. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, Applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Applicant is advised that to be complete, the reply to this requirement must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

A telephone call to the attorney is not required where: 1) the restriction requirement is complex; 2) the application is being prosecuted *pro se*; or, 3) the Examiner knows from past experience that a telephone election will not be made. See MPEP 812.01.
